EDUCATION

California State University of Fullerton 2024-2026
Bachelor of Science in Computer Science

Santiago Canyon College, Orange CA 2021-2024
Associate's Degree

EXPERIENCE

Unity Developer 2025-2026
Speed Creators (Steam Released) (Solo)

A 2D multiplayer platformer racing game made in Unity

- Released on Steam at https://store.steampowered.com/app/1745860/Speed_Creators/
- Designed and implemented a custom networking solution using Facepunch Steamworks
- Created an in-game level editor with 36 unique objects
- Optimized networked objects to allow for lobbies of 100+ players with fully synced traps

Lead Gameplay Programmer Jan-May 2026
Strato (Team of 7)

A 2.5D platform fighter with base building elements

- Implemented a third person movement controller with combat through the use of a finite state machine
- Collaborated with designers and artists to implement 3 unique enemies and 3 unique buildable platforms
- Wrote custom tooling that exposed foilage and resource spawn parameters allowing designers to quickly populate and adjust island environment spawns

Lead Unity Developer Jan-Feb 2025
Skyrail Rush (Team of 3)

An FPS Boss Rush game with a unique vehicle control system

- Led a team of 3 to make 3D FPS boss rush game in a 1 month deadline
- Designed and implemented two unique weapons with a system that allowed for unique firing patterns, a secondary firing mode, and equip/unequip transitions
- Created a modular boss system that let designers easily edit boss behavior and states, resulting in five unique bosses finished within the deadline
